PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in iOS development, machine learning, and AI engineering. Skilled in Swift, Python, PyTorch, SQL, REST APIs, and object-oriented programming, with experience building AI-powered and data-driven applications.

TECHNICAL SKILLS

Programming Languages: Swift, Python, SQL, Java, JavaScript

Mobile and Web Development: SwiftUI, Xcode, iOS Development, React Native, REST APIs, API Integration, HTML, CSS

AI, Machine Learning & Data: PyTorch, Scikit-learn, Pandas, NumPy, Machine Learning, Neural Networks, Large Language Models (LLMs), OpenAI API, Feature Engineering, Data Analysis

Tools and Platforms: Git, GitHub, Jupyter Notebook, Flask, Version Control

EXPERIENCE

Freelance iOS Developer at Covert Defenses, USA

May 2026–Present

Remote Contract/Part-Time

- Develop and maintain iOS application features using SwiftUI and Xcode in a remote contract environment.
- Collaborate on secure mobile workflows and feature delivery while adhering to NDA requirements.
- Manage source control and collaborative development using Git and GitHub.

PROJECTS

Predicting Electric Vehicle Charging Loads | [GitHub](#)

PyTorch • Neural Networks • Pandas • Scikit-learn

- Built a PyTorch feedforward neural network to predict EV charging demand using 6,833 real-world charging sessions from Norway.
- Engineered 26 numerical features by cleaning and merging EV charging logs with hourly traffic sensor data.
- Designed and trained a 26→56→26→1 neural network for 3,000 epochs and benchmarked performance against a linear regression baseline.
- Reduced test error by 5.5%, demonstrating the importance of feature engineering and careful evaluation.

FasalVaidya — AI Crop Health App | [GitHub](#)

React Native • Expo • Flask • Python • Machine Learning • REST APIs

- Built an AI-powered crop health application using React Native and Flask to detect NPK nutrient deficiencies from leaf images.

NexaBrew | [GitHub](#) • [Live Demo](#)

Modern Web Development • React • TypeScript • Full Stack

- Built and deployed a full-stack web application during a hackathon using React and TypeScript, integrating external APIs and focusing on responsive user experience.

EDUCATION

Parul University

Vadodara, Gujarat

B.Tech in Computer Science and Engineering

2024–2028

CGPA: 7.82; Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Machine Learning Fundamentals

CERTIFICATIONS

- [Intro to PyTorch and Neural Networks](#) — Codecademy (Jun 2026)
- [Intro to OpenAI API](#) — Codecademy (Jun 2026)
- [Intro to Large Language Models \(LLMs\)](#) — Codecademy (Jun 2026)
- IBM Python for Data Science — Dec 2025
- IBM Statistics 101 — Mar 2026
- Oracle Java Foundations Certified Junior Associate — Dec 2025
- JavaScript Fundamentals — Apr 2025

ADDITIONAL

- Hands-on learning through hackathons and project-based development.
- Familiar with PyTorch, OpenAI APIs, and LLM fundamentals.
- Collaborative development using Git and GitHub workflows.
